

BIOPHARMACEUTICAL – TECHNOLOGY TRANSFER – BUSINESS DEVELOPMENT

8 May 2008, Munich, Germany

---

**College Hill Life Sciences** are pleased to announce the forthcoming **BioVaria 2008**, presenting “Germany’s next top technologies”, to be held in Munich on 8 May 2008.

The event will be a combined exhibition and conference with Universities and Institutes from right across Germany presenting their technologies to delegates from the Bioscience & Pharmaceutical Industry. It will be the first conference in Germany to bring these two audiences together with the specific aim of enabling multinational pharmaceutical companies and SMEs to learn about the cutting-edge technologies and high-quality commercial opportunities currently available from a wide range of German Universities and Public Research Organisations.

With presentations by top scientists from all over Germany, the event will showcase about 50 patent-protected technologies that will appeal to companies looking to collaborate at an early stage of commercial development. Topics will cover, among other things, the diagnosis or treatment of cancer, infectious diseases, metabolism, autoimmune and neurodegenerative disorders.

The conference is organised by **Ascenion** and its partners **EMBLEM, National Genome Research Network, Fraunhofer VLS, PROvendis, MediGate GmbH, ipal GmbH** and **DKFZ**.

For further information and updates please visit the BioVaria [website](#).

Key features of the event include:

- A host of distinguished speakers and 10-min presentations from top scientists from Public Research Institutions and Universities
- An all-day poster exhibition featuring undiscovered, licensable technologies
- Discussion of scientific details face-to-face with inventors
- Networking with academic scientists and delegates from the Bioscience & Pharmaceutical Industry

**Registration fees include access to presentations and poster exhibition, conference booklet, coffee breaks and lunch. Early registration before February 28, 2008 guarantees a discounted fee.**
